

Stokolan® Classic

Enriched skin conditioning cream

PRODUCT DESCRIPTION

Enriched skin conditioning cream with high levels of moisturisers to care for dry to very dry skin. Lightly perfumed

WHERE TO USE

For use in industrial and healthcare environments, especially where employees are prone to dry or very dry skin.

INSTRUCTIONS FOR USE

- Apply 1ml to clean and dry skin prior to extended breaks and at the end of the working day.
- Rub on all areas of the hands, including between the fingers and around the fingernails.
- Can also be used on the face.

After-work skin care creams help to maintain the skin in good condition keeping it strong and healthy, avoiding dryness. Using care creams is an important element in skin care best practice.

FORMAT: **CREAM**

FEATURES	BENEFITS
Enriched skin conditioning formula	Hydrates and nourishes to help recondition work stressed skin.
Supports skin barrier restoration	Clinically proven to support restoration of the skin barrier function when used regularly.
Contains pharmaceutical-grade Lanolin	An emollient known for its excellent care and skin nourishing properties. Included to help restore natural oils to condition dry and rough skin.
Rich in moisturisers	High levels of Glycerin and Urea enhance the water holding capacity of the skin's upper layers, supporting the skin's own moisture system and helps improve skin elasticity.
ECARF Certified ¹	This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for being well tolerated by sensitive skin. ecarf-siegel.org/en/about-seal .
Silicone-free	Suitable for use in any production sites where paint and surface coating processes are undertaken.
Compatible with rubber production processes	Independently tested at the German Institute of Rubber Technology (DIK) and proven to have no negative effect on the vulcanisation process.

Stokolan® Classic

Enriched skin conditioning cream

STATUTORY REGULATIONS

This product is a cosmetic product regulated by and complying with Regulation EC No 1223/2009 (as amended) on Cosmetic Products.

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information please refer to the Safety Data Sheet which can be downloaded from www.debgroup.com/msds.

SHELF LIFE

This product has a shelf life of at least 30 months from the date of manufacture when stored unopened at room temperature. For shelf life after opening: see indication on packaging.

CERTIFICATIONS

ECARF Seal of Quality

This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for skin tolerability. Cosmetics can receive the seal of quality for meeting the following criteria:

1. Quantitative risk assessment of the product ingredients with respect to their potential for skin sensitisation, taking into account their specified conditions of use and amount.
2. Medically supervised clinical trials by volunteers with atopic dermatitis.
3. Approved system of quality control management.

For more information go to <http://ecarf-siegel.org/en/about-seal>.

QUALITY ASSURANCE

SC Johnson Professional skin care products are manufactured in facilities which follow cosmetic Good Manufacturing Practice (cGMP) requirements.

All raw materials used for production undergo a thorough quality control process before being used for manufacturing in our high quality products.

All finished goods are subject to intensive quality testing before being shipped out to our customers.

PRODUCT SAFETY ASSURANCE

Skin Compatibility Test

Independent dermatological tests conducted to assess the skin compatibility of the product using voluntary test persons in occlusive, 69 consecutive hour application models, shows the product to be non-irritating in use.

Toxicological Approval

The product has been assessed by an independent toxicologist and has been declared to be safe for use on the hands, face and neck of adults and children aged 3 and above.

COMPATIBILITY TESTS

Rubber Production Process Compatibility

In testing conducted by the Deutsches Institut für Kautschuktechnologie (DIK) in accordance with DIN EN ISO/IEC 17025, the use of Stokolan® Classic in rubber production process does not influence the cohesive strength of rubber.

EFFICACY TESTS

Skin Hydration Test

The moisturising properties of Stokolan® Classic were assessed via application of the product twice daily at an interval of approx. 5 hours to the forearm skin of healthy volunteers over a 4 day test period. The starting values for the skin moisture were determined in the morning by means of the Corneometer® and before the first application and then again on the morning of the subsequent day.

Results show that under repeated usage conditions, Stokolan® Classic provides a continuous increase in the hydration of the skin by 31.7% over untreated skin. This demonstrates that the skin moisture is clearly improved by Stokolan® Classic when used regularly.

Skin Barrier Restore Test

Skin barrier testing was performed on the forearm skin of healthy volunteers. Skin damage was induced by occlusive application of 0.5% sodium lauryl sulphate solution over a 12 hour period. The initial damage of the skin was classified by means of two parameters: a) visual inspection (irritation score according to Frosch and Kligman) and b) trans-epidermal water loss (TEWL as an indicator of the skin barrier quality). Stokolan® Classic was then applied twice daily at an interval of approx. 5-6 hours over a 4 day test period,

Results show that under repeated usage conditions, both the visually apparent damage and the barrier damage characterised by the TEWL is reduced compared to untreated skin. This demonstrates that when used regularly, Stokolan® Classic supports restoration of the skin's own natural barrier function.
