## Infection Control

The dangers of leaving biohazardous substances and potentially infected sharps unattended should not be underestimated. Without the correct equipment to clean up the affected area, people are at risk of contracting illnesses and spreading diseases.

Our kits and products provide the suitable equipment to appropriately deal with biohazardous substances and sharps in the safest possible way.

## Body Fluid Clean Up Kits

We provide a wide range of biohazard products. Our range of Biohazard Kits enables the user to safely clean up and dispose of biohazard spills, including blood, urine and vomit, with added items for personal protection, to ensure the user has maximum safety when dealing with hazardous substances.

### Mini Body Fluid Clean-Up Kit 1 Application

#### Micro

This compact and portable kit is used for the safe clean-up and disposal of body fluid. Our Mini Clean-Up Kit is ideal for when on the move and contains the necessary equipment for 1 application.

## Infection Control Top Tips

The dangers of biohazardous substances and potentially infected sharps should not be underestimated. We have put together top tips when using our BioSafe® product range.

### 1 Minimise Contact

Handle materials as little as possible and transfer them via routes that minimise exposure to others.

### 2 Personal Protective Equipment

To reduce the risk of spreading infections by wearing all the protective equipment correctly.

### 3 Sharps Disposal

Safely dispose of sharps using the pierce resistant containers provided.

### 4 Bag it up

Only use the biohazard bag provided. The Yellow bag is specially marked and is UN approved.

### 5 Do not Overfill

Never fill a bag or container more than ¾ full.

### 6 Dispose Correctly

Check with your local council about the disposal of biohazard waste. It may need to be incinerated rather than sent to landfill.

## Body Fluid & Sharps Disposal

BioSafe® Combination Kits contain the appropriate materials to safely and quickly deal with both body fluid clean up and sharps disposal. This innovative and easy to use product range is specifically designed to reduce the risk of infection and cross-contamination from biohazards such as body fluids and discarded needles. This range has been designed with a strong focus on end user safety and ease of use.

### Body Fluid & Sharps Disposal 3 Application PGB Medium

Our multi-purpose 3 application Body Fluid & Sharps Kit provides all the equipment you need to effectively and safely dispose of bodily fluids, hazardous substances and sharps.

## Body Fluid & Sharps Disposal Packs

These disposal packs are ideal for single use or as kit refills. They are specifically designed for the safe disposal of potentially dangerous biohazard spills and sharps, preventing the risk of infectious agents and diseases spreading through cross-contamination. These packs provide the necessary equipment to dispose of hazardous substances and items safely. The materials included help you to effectively discard used needles, syringes, blades and body fluid, preventing harmful infection spreading.

### Sharps Disposal Pack

Our standard sharps pack provides the basic utensils for dealing with used needles, syringes and blades in a safe and efficient way.

| Code  | Description             | QTY  |
|-------|-------------------------|------|
| 51083 | Plastic Scoop & Scraper | Each |

### Plastic Tweezers

These plastic tweezers are suitable for safely handling biohazard materials.

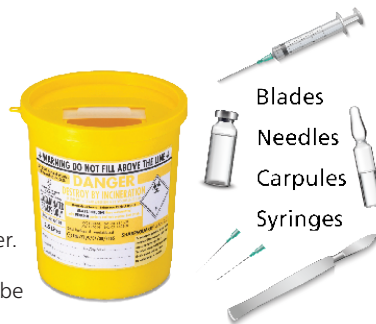

| Code  | Description           | QTY  |
|-------|-----------------------|------|
| 51086 | Plastic Tweezers - 5" | Each |

### Sharps Disposal Containers

A good rule of thumb is if the sharp object can puncture the skin and possibly contain blood borne pathogens, then it should be disposed of within a sharps container.

Sharps containers must be incinerated once filled.

Our range of BioSafe® products have been specially designed with the end user in mind.

We provide essential equipment needed to appropriately deal with biohazardous substances and sharps in the safest possible way.
