THE MOST SUSTAINABLE FIRST AID KIT

BY WALLACE CAMERON

Where compliance meets responsibility

The Growing Demand for Sustainable Products

In today's market, there is an increasing demand for greater social and environmental responsibility in manufacturing. Cultural shifts and government commitments, such as the aim to achieve net zero emissions by 2050, are creating significant pressure, particularly within business-to-business markets.

In the UK, Health and Safety Executive (HSE) regulations make first aid products a necessity for all businesses. Our sustainable First Aid Kits provide customers with a straightforward way to help businesses meet their Environmental, Social, and Governance (ESG) objectives.

Consumers and businesses alike are increasingly seeking products that align with their sustainability values. Sustainable packaging and eco-friendly materials are no longer optional—they are fast becoming the norm, especially in sectors such as workplace safety and health.

By offering Wallace Cameron's Sustainable First Aid Kit, customers can respond to these changing demands and stay ahead of the curve.

What Makes Our Sustainable First Aid Range Different?

At Wallace Cameron, we believe that protecting both people and the planet should go hand in hand. Meeting the demand from the market, we have taken time and pride in developing the best components to make our sustainable first aid kit the most sustainable on the market.

Our Most Sustainable First Aid Kit is thoughtfully designed with this in mind, featuring a durable, reusable case made from 100% recycled and recyclable plastic. We've replaced traditional cotton and plastics with viscose and medical-grade paper packaging to cut down on plastic waste, and even the plasters are biodegradable.

By switching to the Wallace Cameron Sustainable First Aid Kit, we can help protect people and the planet, together.

Our commitment to creating the most sustainable first aid kit starts with reducing the use of new plastics wherever possible.

Sustainable Packaging

We've replaced traditional internal packaging with medical-grade paper and recycled, recyclable cardboard to minimise waste. Additionally, we've removed unnecessary packaging from within the kit to further reduce environmental impact.

The box itself is made from SGS certified, 100% recycled and recyclable materials, and we've opted for screen printing, allowing for more customisation than laser etching, while removing the need for front and rear labels, reducing plastic waste.

For added sustainability, kits can also be stored and shipped in biodegradable shrink wrapping upon request. With every decision, we've prioritised both effective care and a responsibility to the planet.

Sustainable Components

Unlike other sustainable first aid kits on the market, we go beyond just packaging — we're committed to reducing plastic and enhancing the durability of every component within our HSE and BSI compliant kits.

By using sustainable materials such as viscose, bamboo pulp and recycled plastic, we ensure that each kit is as eco-friendly as possible while maintaining full compliance with industry standards.

In addition, all our HSE and BSI kits are available as refills, providing a sustainable, cost-effective solution for businesses to stay compliant and reduce waste over time.

What's inside?

Washproof Plasters

Order Code: **12110675**

Hypoallergenic, sterile plasters designed to effectively and comfortably stay on the patient for as long as needed. The breathable material helps aid the recovery of the wound.

Saline Wipes

Order Code: **16010265**

Impregnated with a 0.9% sodium chloride solution, these wipes are safe for all skin types. Individually wrapped and sterile, they ensure hygienic application every time.

Sterile Dressings

Order Code: **14010015, 14010025, 14010205, 14010035, 18010095**

Sterile dressings with bandaging, Wallace Cameron dressings are perfect for moderate to severe wounds. Dressings in our first aid kits come in the required quantities for HSE and BSI standard first aid kits.

Triangular Bandage

Order Code: **50010185**

These versatile triangular bandages are ideal for wound care, as well as being used as supports for shoulders, arms, wrists and hands.

Gloves

Order Code: **R042245**

Powder-free medical gloves for use when treating a patient. Made from nitrile, our gloves are hypoallergenic.

Resuscitation Aid

Order Code: **50010185**

A mouth-to-mouth resuscitation aid which prevents the spread of germs between patient and rescuer.

Sustainable Features:

Our biodegradable plasters are plastic-free, manufactured from 50% wood pulp and 50% bamboo pulp. Replacing traditional grip seal packaging, our plasters are housed in 100% recycled and recyclable cardboard.

Sustainable Features:

Saline wipes are made from 100% viscose, which is compostable and more biodegradable than traditional cotton wipes. The individual wipe sachets effectively retain moisture, enhancing their lifetime.

Sustainable Features:

All sterile dressings are housed in medical-grade paper. Due to strict requirements for dressings in HSE and BSI standard first aid kits, these dressings are made from traditional materials.

Sustainable Features:

Our triangular bandages are made from 100% viscose, making them much more environmentally friendly than traditional cotton and plastic triangular bandages. Housed in medical-grade paper pouches.

Sustainable Features:

Made from strong, stretchable nitrile or vinyl to reduce the likelihood of tears resulting in unnecessary waste. Gloves are housed in fully recyclable cardboard sleeves.

Sustainable Features:

Our resuscitation aid comes packed in a recyclable card sleeve to reduce plastic packaging compared to traditional resuscitation aids.

What’s inside?

Microporous Tape

Order Code: **20050155**

Tape for securing dressings and bandages during first aid. The material allows air to pass through, encouraging a wound to heal.

Thermal Blanket

Order Code: **48030095**

For treating shock and helping maintain a patient’s body temperature in cold or hot environments.

Scissors

Order Code: **2012275**

Required in BSI first aid kits, our scissors are ergonomically designed to make cutting bandages and clothing on a patient, easy and safe.

Sustainable Features:

The strong adhesive used in our microporous tape reduces waste. The tape is packed in a recyclable card box, rather than traditional plastic packaging.

Sustainable Features:

Our thermal blankets come packed in a paper pouch rather than traditional plastic pouches.

Sustainable Features:

Our scissors are made from durable metal designed to be reused and the handles are made from recycled plastic.

Join Us In Creating a Safer, Greener Future

We are passionate about providing products that not only keep you safe but also protect the planet.

Our Sustainable First Aid Kit Range is just one step in our journey toward a more sustainable, eco-friendly future. While other brands may offer sustainable first aid kits, we've raised the bar by combining eco-conscious materials with our trusted medical standards. Our sustainable kits provide the same reliable, effective care you expect, with the added benefit of knowing you're making a responsible choice for the environment.
