+ Pull handle made with stainless steel 304
+ Ideal for all commercial, public area's
+ It is recommended use only for liquid gel and hand sanitizing liquids.
+ Foam pump available
+ It doesn't support liquids that contains chlorine or solid abrasive particles.
+ It is mounted with four steel 4 mm screws (provided in the box) with their 8 mm plastic plugs (also provided)
+ Key lockable system that protects the inner tank

LIQUID

Part Code E-1MSD/LBS

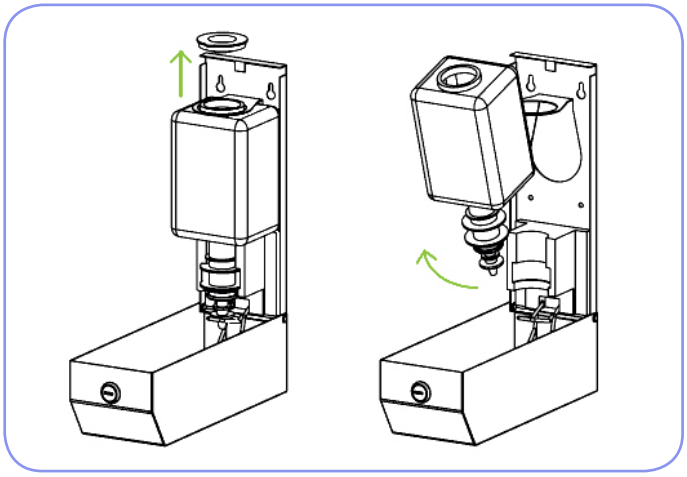

FOAM

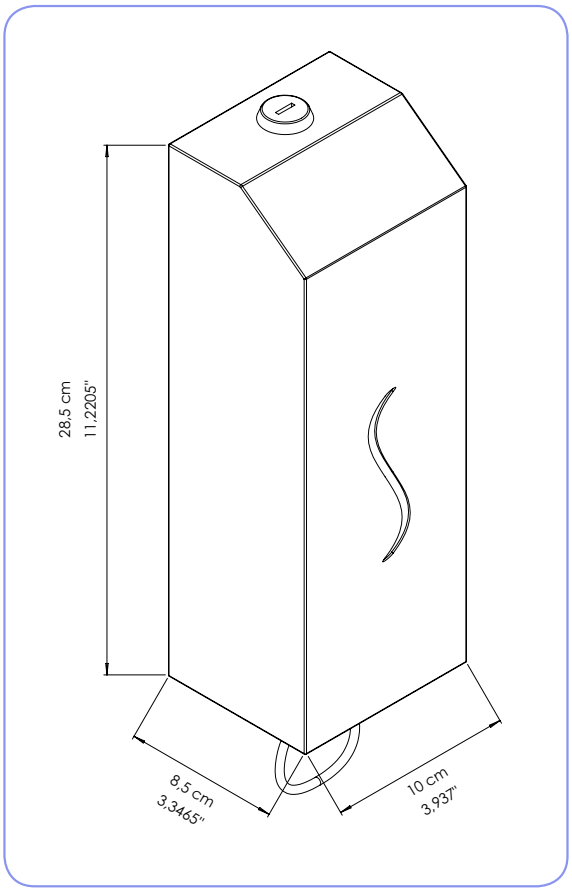

Part Code E-1MSD/FBS

DOSAGE VOLUME OF THE PUMPS

+ Soap Pump: 1.6 ml per shot
+ Foam Pump: 0.45 ml per shot

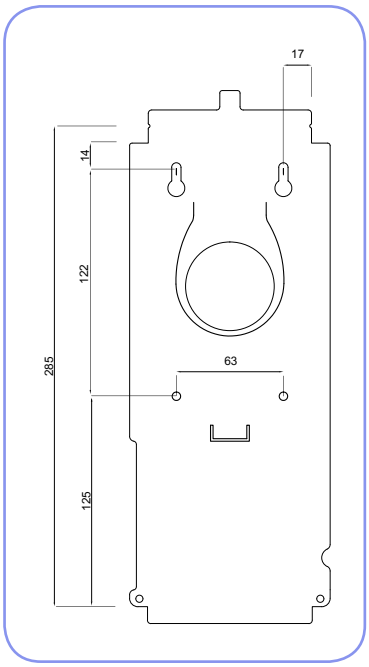

+ It has lock system that protects the refillable reservoir made with steel and provided into the box.
+ Inner plastic reservoir is made with polyethylene The tap on the tank helps to refill easily.

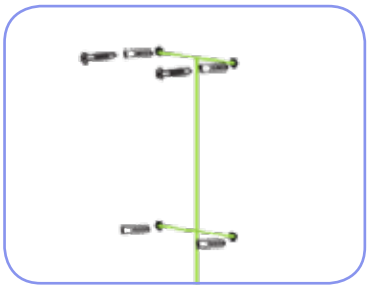

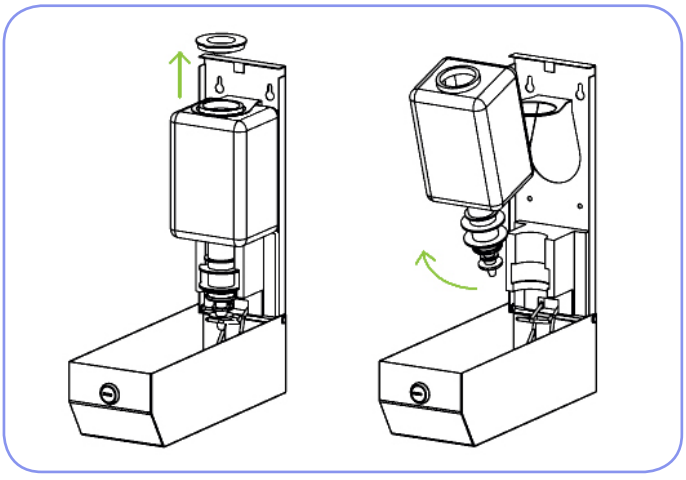

INSTALLATION

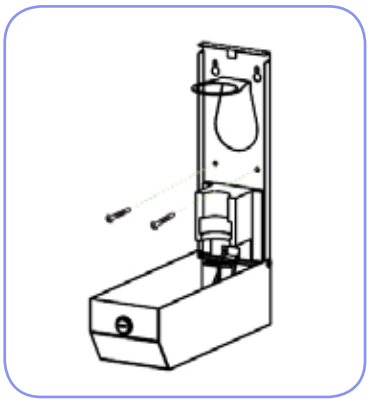

+ First measure out where the liquid dispenser will be placed, mark four holes and drill into the wall.
+ Insert the provided wall plugs and screw in the top two screws, leaving a slight gap for the dispenser to slot onto.
+ Remove the liquid container before mounting the dispenser to the wall. This can be done by removing the lid and lifting the metal ring to allow the liquid container to release.
+ Slot the dispenser onto the two previously fixed screws and then screw final two screws.

+ Once the dispenser is secure, insert the liquid container back into the dispenser.
+ Once the container is back in place, use the provided key to lock the cover closed.

FILLING THE TANK

1. Open the cover as described here above.
2. Unscrew the cap at the top and fill the tank avoiding spilling outside. Replace the cap and close the cover.

MOUNTING TEMPLATE

Should be minimum 100 cm high from the floor.

DISPENSER REPLACEMENT REQUIREMENTS AND RECOMMENDATIONS

The following recommendations are intended to provide guidelines on the best possible placement of the dispensers. Because every location a dispenser is to be mounted is different, depending on customer site, physical size limitations, and available space, these recommendations may not always be entirely possible to follow.However, when placing a dispenser installation must meet ADA requirements and should promote ease of use and be in union with its surroundings.Upon installation, the dispenser should be level and the job results professional,presentable and fully functional.

AFTERCARE INSTRUCTIONS

+ Regular cleaning with a soft cloth will keep the surface of your product looking new. Soapy water can be used to remove stubborn marks. Dont use abrasive or chemical cleaners as thsese may damage the surface finish over time.
+ Don’t expose to sunlight.
+ Don’t respond to the product with force against the possibility of damnification, deformation.
+ Don’t throw any cigarettes and flammable materials into the product.
