

H3 - C-fold and ZZ-fold system

Think ahead.

Tork Extra Soft Singlefold Hand Towel Premium

Article	100278
System	H3 - C-fold and ZZ-fold system
Colour	White

Comfort your guests with the soft Premium Tork Singlefold Hand Towels that are gentle to the hands with a high quality feel. Suitable for the Tork Singlefold Hand Towel Dispenser for demanding environments. Help control consumption and promote good hygiene with reliable one-at-a-time dispensing.

Key benefits:

- Attractive Tork Leaf décor: designed to make a great impression
- QuickDry™ – our strongest, most absorbent paper, for more efficient drying with less waste
- One-at-a-time dispensing for reduced consumption and increased hygiene

Environmental

Content

The product is made from

Material

Virgin fibres
To reuse broke we use:
We do not use softeners for professional hygiene products.

Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.
In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.
The packaging material is made from paper or plastic.

- Pulping aid (chemicals that help to repulp wet strong paper)

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.
To control product performance we use additives:

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

Article creation date and latest article revision

Date of issue: 19-04-2019
Revision date: 04-05-2021

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

Virgin pulp

Essity UK Ltd, Southfields Road,
Dunstable, Bedfordshire LU6 3EJ,
United Kingdom

In most of our mills we do not add optical brighteners.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.
In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
This product is certified for the EU Ecolabel.

Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.
Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

Environmental certification

This product is certified for FSC®.

Production

This product is produced at KOSTHEIM mill, DE and certified according to HACCP, ISO 9001, ISO 14001 (Environmental management systems), OHSAS 18001, EMAS (eco-management and audit scheme), ISO 50001 and FSC Chain-Of-Custody.
Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.
