Provide superior hand drying and comfort to your guests with the large and soft Premium Tork Xpress® Soft Multifold Hand Towels that are gentle to the hands with a high quality feel. These towels are suitable for the Tork Xpress® Multifold Hand Towel Dispenser for medium traffic washrooms. Fits small places and provides both comfort and hygiene to your guests.

### Key benefits:

- Attractive Tork Leaf décor: designed to make a great impression
- A large, soft hand towel with a high quality feel that leaves a lasting impression
- QuickDry™ – our strongest, most absorbent paper, for more efficient drying with less waste
- One-at-a-time dispensing for reduced consumption and increased hygiene

## Environmental

### Environmental certification

- Pulping aid (chemicals that help to repulp wet strong paper)

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.

### Production

This product is produced at KOSTHEIM mill, DE and certified according to HACCP, ISO 9001, ISO 14001 (Environmental management systems), OHSAS 18001, EMAS (eco-management and audit scheme), ISO 50001 and FSC Chain-Of-Custody.

Essity UK Ltd, Southfields Road,  
Dunstable, Bedfordshire LU6 3EJ,  
United Kingdom

We do not use softeners for professional hygiene products.

In most of our mills we do not add optical brighteners.

Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

High product quality is secured through quality and hygiene management systems throughout production, storage and transport.

This product is certified for the EU Ecolabel.

The packaging material is made from paper or plastic.

### Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

This product is certified for FSC®.

### Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.

To control product performance we use additives:

In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

### Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

### Article creation date and latest article revision

Date of issue: 19-04-2019

Revision date: 04-05-2021

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

Virgin pulp

### Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

To reuse broke we use:

### Content

The product is made from

### Material

Virgin fibres
