Tork Heavy-Duty Wiping Paper

Article	130070
System	W1 - Wipers wall/floor /standard system
Colour	Blue
Ply	2
Roll length	340 m
Roll width	36.9 cm
Roll diameter	37.5 cm
Number of sheets	1000
Sheet length	34 cm
Core inside diameter	7.1 cm
Embossing	Yes
Print	No

The 2 ply multi-purpose Tork Heavy-Duty Wiping Paper is ideal for mopping up liquids and hand drying. This paper can be used in either the Tork Floor or Wall Stand dispensers, which are developed for safety, efficiency and reliability with their easy load and tear-off features and the possibility to take the required paper with only one hand.

Key benefits:

- Tork Easy Handling® plastic packaging – for easier carrying and disposing of packaging
- Multipurpose - handles general wiping tasks that require strength and absorbency
- Its strong texture and high absorbency makes it ideal for removing oil, grease, lubricants and dirt
- High durability - stays strong even when wet, and is reusable

Environmental

Content

The product is made from
This product is certified for FSC®.
Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

This product is certified for the EU Ecolabel.
In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.
The packaging material is made from paper or plastic.

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.
To control product performance we use additives:

Environmental certification

To reuse broke we use:

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.
High product quality is secured through quality and hygiene management systems throughout production, storage and transport.
We do not use softeners for professional hygiene products.

In most of our mills we do not add optical brighteners.
In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

Production

This product is produced at KOSTHEIM mill, DE and certified according to HACCP, ISO 9001, ISO 14001 (Environmental management systems), OHSAS 18001, EMAS (eco-management and audit scheme), ISO 50001 and FSC Chain-Of-Custody.
