

H3 - C-fold and ZZ-fold system

Think ahead.

Tork Flushable Singlefold Hand Towel Advanced

Article	290190
System	H3 - C-fold and ZZ-fold system
Colour	White

Satisfy hand drying needs with the Advanced Tork Singlefold Hand Towels, the right quality for when cost and performance are equally important. These towels are suitable for the Tork Singlefold Hand Towel Dispenser for demanding environments. They help control consumption and promote good hygiene with reliable one-at-a-time dispensing.

Key benefits:

- Attractive Tork Leaf décor: designed to make a great impression
- Flushable hand towel ideal for high risk areas where towels may be put in the toilet instead of the waste bin
- One-at-a-time dispensing for reduced consumption and increased hygiene

Environmental

Production

This product is produced at KOSTHEIM mill, DE and certified according to HACCP, ISO 9001, ISO 14001 (Environmental management systems), OHSAS 18001, EMAS (eco-management and audit scheme), ISO 50001 and FSC Chain-Of-Custody.
This product is certified for the EU Ecolabel.

Environmental certification

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

- Pulping aid (chemicals that help to repulp wet strong paper)

Content

The product is made from

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

To control product performance we use additives:

- Wet strength agents (for Wipers and Hand Towels)
- Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)
- For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added
- For printing products printing inks (pigments with carriers and fixatives) are applied
- For multi ply products we often use water soluble glue to secure the integrity of the product

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

High product quality is secured through quality and hygiene management systems throughout production, storage and transport.

There are different methods used today for bleaching: ECF (elementary chlorine free, where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

This product is certified for FSC®.

In most of our mills we do not add optical brighteners.

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

We do not use softeners for professional hygiene products.

Chemicals

All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.

Virgin pulp fibres are produced out of softwood or hardwood. The wood is subject to chemical and/or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.

Virgin pulp

To reuse broke we use:

Essity UK Ltd, Southfields Road, Dunstable, Bedfordshire LU6 3EJ, United Kingdom

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.

Material

Virgin fibres

The packaging material is made from paper or plastic.
